

First-UAN 30

30-0-0

First UAN 30 can be applied by drip or sprinkler irrigation. It can be blended with other fertilizers or applied as a foliar treatment on selected crops. When used as a foliar fertilizer, First UAN 30 should first be diluted with water before acidifying. First UAN 30 can be applied to a wide variety of ornamental, turf, greenhouse, and other agricultural crops. Nitrogen requirements for most plants increase dramatically during periods of rapid growth.

GUARANTEED ANALYSIS

Nitrogen (N)	30.00%
7.50% Ammoniacal Nitrogen (N)	
7.50% Nitrate Nitrogen (N)	
15.00% Urea Nitrogen (N)	

Derived from: Urea, Ammonium Nitrate

DIRECTIONS FOR USE

First-UAN 30 can be soil or foliar applied through ground applications. Use sufficient water for thorough and uniform coverage of foliage or soil. Foliar application is recommended when fast correction is desired. First-UAN 30 will disperse in water with minimal agitation. Always check compatibility before mixing. Follow the mixing sequence: 1. Water; 2. First- UAN 30; 3. Pesticide. Do not apply to foliage of any crop when temperatures are above 90°F. Apply First UAN30 early morning or late evening.

RECOMMENDED RATES

The optimum rate and timing of application will depend on local conditions and should always be made as a result of soil and/or plant tissue analysis in consultation with your local turf/ornamental authorities. In the absence of test results use the following as a guide. Use the following rates with sufficient water for thorough coverage.

Cool Season Grasses.....	3-4oz/1000 sq ft with 1-2 gallons water
Warm Season Grasses.....	2-6oz/1000 sq ft with 1-2 gallons water

Density: 10.6 lbs / Gallon @ 68°F
Net Contents: 2.5 Gallons (9.46L)
Net Weight: 26.5 lbs (12.02 KG)
