

First-pH Indicator

Spray Tank Acidifier / Indicator

First-pH Indicator is a spray tank acidifier which corrects the alkaline hydrolysis of pesticides and certain fertilizers, neutralizes bicarbonates in spray tank water, and corrects hard water conditions in the spray tank solution. First-pH Indicator has a built-in indicator, making pH adjustments easy. pH levels can be determined simply by observing the color of the spray tank water as shown in the chart.

ACTIVE INGREDIENTS

Acidifiers	20%
Emulsifiers	0.5%
Color indicator	1.0%
Inert Ingredients	78.5%

DIRECTIONS FOR USE

Add First-pH Indicator into the spray tank prior to adding pesticides or fertilizers. Determine the pH of the spray tank from the chart below. The typical rate for First-pH Indicator is 4-8 oz. per 100 gallons of water which decreases water pH from 8.5 to 5.0 depending upon the water source.

WATER pH COLOR INDICATOR KEY

Pale yellow: pH = 7.0
Golden yellow: pH = 6.0 - 6.5
Red: pH = 4.5 - 5.0

A jar test is always recommended to check the compatibility of unfamiliar or new combinations prior to mixing and applications. Mixing order is important; a change in the order of addition can affect product performance. Check with your sales representative for specific directions.

Density: 10.1 lbs. / gal @ 68°F
Net Contents: 1 gal (3.79L)
